

UNIRRO Remote

BLE

Main Features of the product:

- Sleek & classic design
- Cleanable keypad
- Controls multiple Unirro keypads
- Direction free control
- LED and Buzzer feedback
- Long battery life

The world's first remote control was zenith flash-matic, invented in 1955. Since then consumers have always aspired for user-friendly and convenient methods to control appliances. The technology used in remote has evolved from flashing light to ultrasonic to IR to RF and now to Bluetooth. At Lebenor, we move with the latest trends in technology and hence our engineers developed a remote with Bluetooth as the technology platform. Unlike the conventional IR remotes, the Unirro remote is non-directional and the user gets the convenience of controlling the appliances without pointing the remote towards them.

This BLE Remote from Lebenor is designed in such a way that it will be handy and easy to use. Connect to four Unirro keypads and the control of the home is at your fingertips.

Areas of Application:

- Private residences
- Hotel rooms
- Hospital rooms
- Office cabins
- Conference rooms

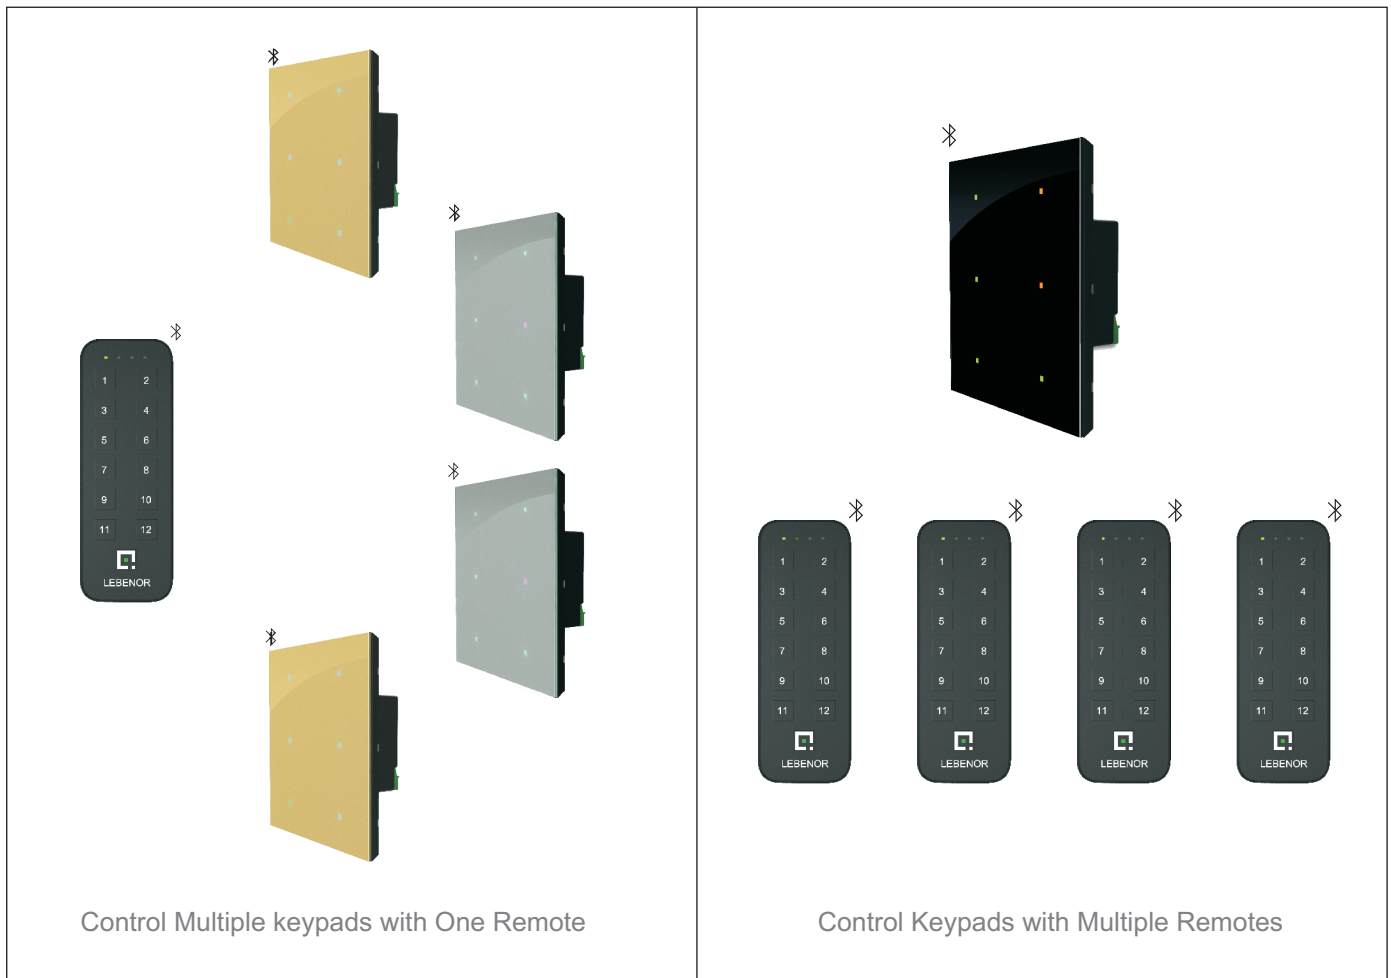

Technical Specifications:

- Number of Buttons: 13
- Number of LED indicators: 4
- Communication: BLE
- Battery: 2 x 1.5V, AAA
- No of connections: 4

Mechanical & Environmental:

- Dimension: 140 x 50 x 20mm
- Enclosure: ABS
- Fascia Material: PC
- Operating temperature: 0-55° C

Application:

Order Reference: Remote

- 13 Button BLE Remote
Order ref: UNI-REM-13-0202
